

Breaking the Plateau:

CU Medicine Unlocks 92% Coding Automation

How autonomous medical coding helped CU Medicine overcome CAC limitations and reduce manual workload.

The Challenge

CU Medicine was facing rising coding volumes and a growing provider base. Their existing CAC tools had stalled at 46% automation, demanding constant analyst oversight. With staffing shortages delaying billing and reimbursements, their team needed a scalable solution to boost accuracy, ease manual burden, and deploy without disrupting workflows.

The Solution

CU Medicine implemented the autonomous, AI-powered coding platform from CodaMetrix—designed to increase automation, reduce coding delays, and scale without intensive maintenance or workflow changes. Implementation was seamless, with zero disruption to existing processes or systems.

Increased automation

Reduced coding delays

Scaled without workflow changes

CU Medicine: Scaling to Keep Pace

CU Medicine provides administrative and revenue cycle support to nearly 3,000 providers across two major hospitals. The Professional Billing group handles ~6,000 visits per day—and needed a smarter, scalable coding solution to keep pace. After struggling with the limitations of traditional CAC, the team turned to CodaMetrix for true AI-powered automation.

“

Through the adoption of CodaMetrix, we've reached unprecedented levels of automation—with a ripple effect across our entire organization.

Kim Davis

SENIOR DIRECTOR, REVENUE SERVICES, CU MEDICINE

The Results

CU Medicine achieved immediate and measurable improvements across multiple metrics:

92%

**of radiology
coding now
automated**

Enabled by a
platform built for
scale and accuracy

64%

**reduction in
manual coding**

FTEs reassigned to
other departments

3.6

**day drop in
coding lag**

Faster reimbursement,
reduced billing delays

Eliminating CU Medicine Backlogs

More bandwidth for strategic projects and future growth

Looking Ahead

Encouraged by early results, CU Medicine is expanding its implementation into additional service lines and locations, including Pathology, Surgery, and the Children's Hospital of Colorado.

Interested in seeing how CodaMetrix will bring you value?

The AI-powered Autonomous Coding Platform from CodaMetrix improves medical coding quality and performance to streamline operations, reduce workloads and elevate both clinical and financial performance.
