AI Agents That Own Outcomes, Not Just Tasks

Adonis AI Agents go beyond automation to deliver real RCM outcomes through the orchestration of Adonis Intelligence. They tackle specific challenges like eligibility denials and A/R by combining the right tools, insights, and workflows. Agents **act with context**, **learn from payer behavior**, and **continuously improve,** driving faster cash flow with less manual effort. All results are written back into your system of record — no extra work, no hidden costs.

We support high value workflows like **claim status inquiry, timely filing, documentation follow-up** and more, by leveraging and combining capabilities across:

- Payer Phone Calls
- Appeal Generation
- RPA
- Notes Write-Back
- eFax
- Eligibility API
- Claim Submission

AI Agents

Q Search by task name and agent type..

Recently Assigned

Assigned Task	Status	Agent Type	Est FTE Savings	Assigned
VA Authorization Fix	Active	Pre-Cert	3.1	10:05 PM
Athena Health Eligibility	Active	Eligibility	1.9	Yesterday
Payer Rule Compliance Check	Active	Denials	5.7	Monday

Adonis AI Agents in Action

Prioritize Impactful Claims

Focus on the highest value claims first to speed up resolution and impact.

Deploy the Right Solution

Automate the smartest path to resolution by activating the right mix of agentic capabilities.

Maximize Outcomes

Achieve tangible ROI, better collection rates, and significant cost savings.

Results We Drive

Adonis partnered with a leading U.S. emergency medicine provider to reduce costs, delays, and errors in VA claims processing. AI Agents automated outreach to the VA, capturing critical data to improve efficiency and lower denial rates.

>95%
success rate of agent phone calls

>50%
reduction in denial rate on impacted claims
