

# Steer GetCareNow

GetCareNow is Steer's flagship Emergency Scheduling Platform that creates a more manageable influx of patients in Emergency Departments and reduces patient wait times.

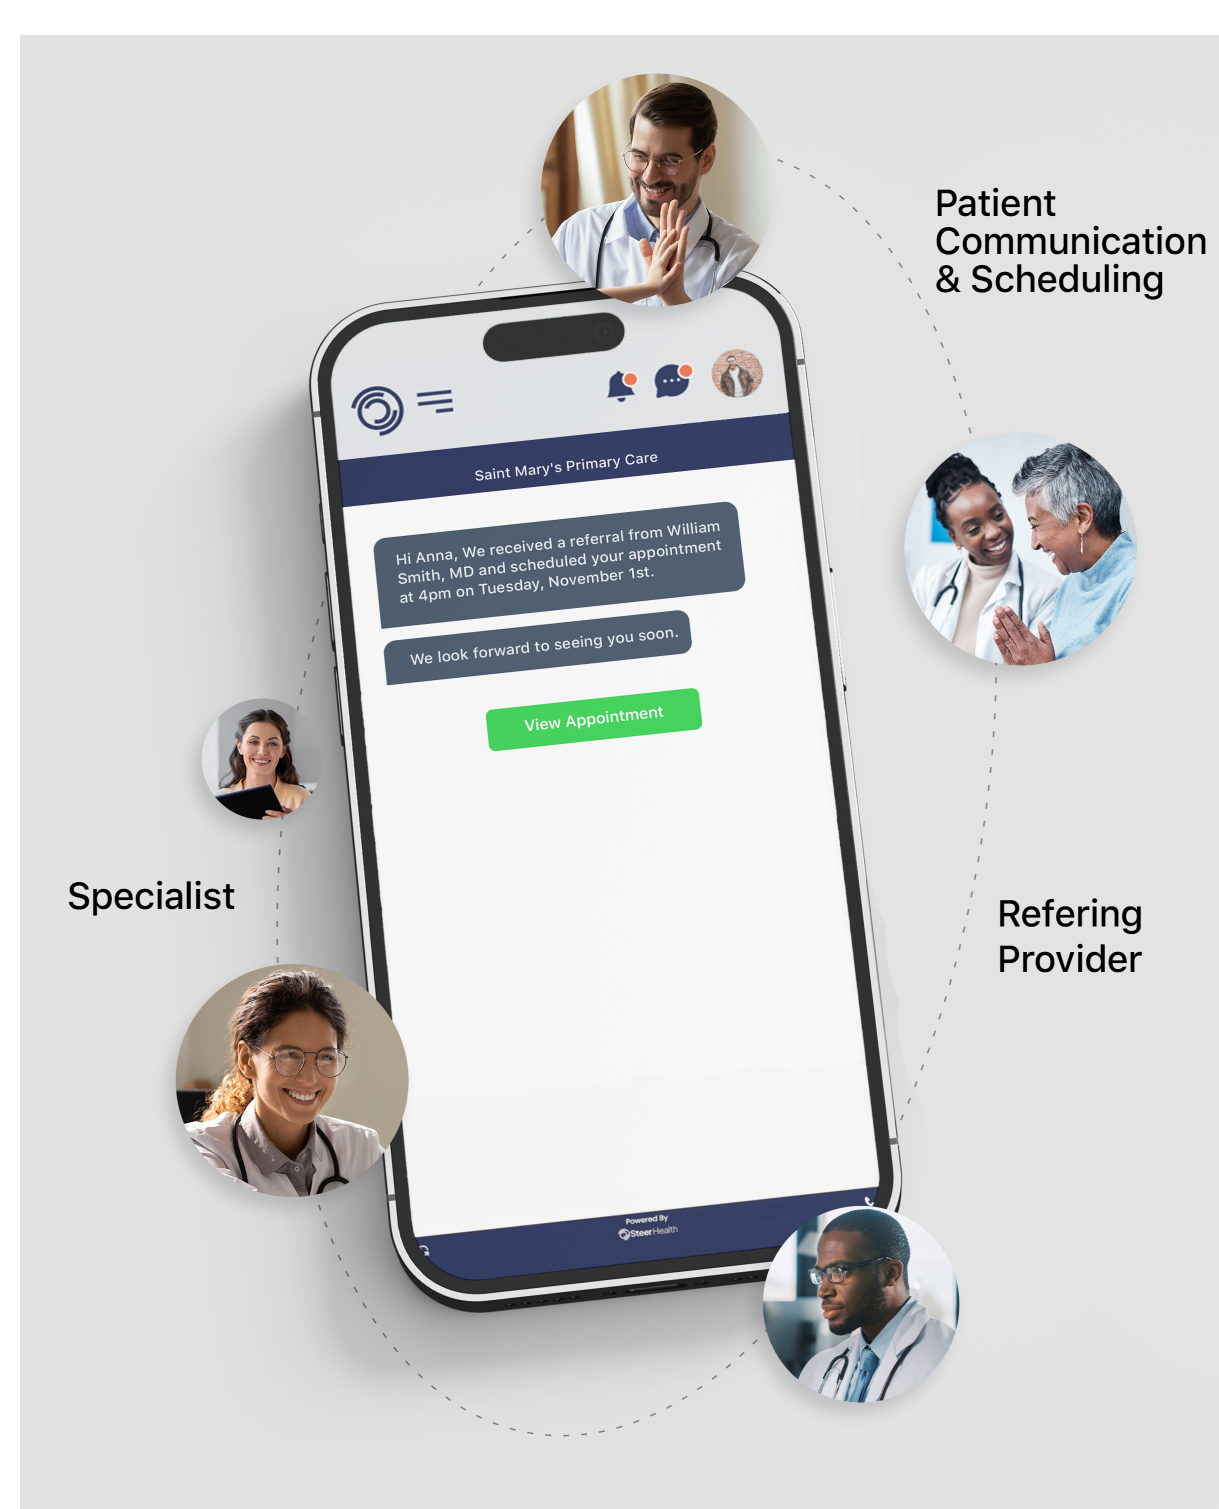

## Set up online scheduling for the ER

GetCareNow enables patients with non-life-threatening conditions to make appointments online and bypass the ER and urgent care center waiting room.

## Reduce administrative burden

Pre-screening for symptoms helps identify urgent care needs and helps staff refer patients based on their needs. Pre-registration forms and automated triaging reduce the amount spent registering patients that come into the ER.

## Keep patients in-network

Automated network referrals improve the routing of patients to in-hospital specialists or to physicians in in-network medical groups.

Transform your Emergency Department from Chaos to Calm with quicker workflows and a more predictable patient influx.
