Digital whiteboards enhance unit efficiency by providing visual cues and real-time information about patients, rooms, statuses, alerts, alarms and more.

Fully customizable, digital patient whiteboards can set your facility apart when it comes to patient-centric care. Patients love knowing where to look for real-time information about their progress, their care plan, and knowing who is part of their care team.

EVS Dashboards are a game changer when it comes to seeing the big picture regarding rooms statuses, requests, and availability. Facilities love working smarter... not harder.
