

Your clinicians want
to care for patients.
Not type reports.

 Suki Hears You

Suki Assistant

Streamlines time-consuming administrative tasks so clinicians can focus on their patients.

Generates notes ambiently

Listens to patient-clinician conversations and automatically suggests note content.

Recommends codes

Suggests diagnosis codes and automatically pulls in applicable HCC codes.

Does dictation

Lets you dictate edits to your notes, or into any field in the EHR.

Answers questions

Retrieves information from the EHR, like patient vitals or medications.

Enterprise grade.

We've made the investments to meet and surpass the needs of health systems. That's why health systems across the country choose Suki.

A true assistant.

Suki does ambient documentation, dictation, ICD-10 and HCC coding, and answers questions, all in one solution. And it's available for iOS, Android, web, and desktop.

Deepest integration with all major EHRs.

Blend note content. Pull dynamic data. Incorporate up to date info. Suki sets the standard for what's possible for EHR integrations. No one else comes close.

AI that's safe.

Designed to minimize the risk of hallucinations and bias, and ensures content is clinician-reviewed before it's sent to the EHR. We're also SOC2 Type 2 certified and HIPAA compliant.

Scales with the largest health systems.

Suki serves some of the biggest health systems across the country, reliably and dependably. Whether you have 100 or 100,000 clinicians, we can support you.

Hassle-free implementation.

Our best in class implementation and deployment process requires minimal IT resources from your organization. Plus, we're available 24/7/365.

Proven ROI, fast.

Suki helps health systems achieve incremental revenue in a variety of ways, from higher reimbursements to additional encounters. Clients are ROI positive by month 2.
