

*“Coordinsita is a unique and versatile product offering that is a great fit for multiple use cases of Avail’s clinician programs. We have successfully deployed it in a state-wide mobile nursing/virtual NP deployment serving post-acute settings. We look forward to using Coordi in multiple ways to support quality and compliance in our CMS GUIDE offering and are currently exploring TOC and I-SNP contracts in which Coordi would be deployed to enable central features of the contract. I foresee Coordi being a part of Avail’s tech stack for a long time.”*

– Joe Harrison, CEO Avail Healthcare, August 18, 2025
