Objective Arts®

THE OBJECTIVE ARTS BEHAVIORAL HEALTH ANALYTICS PLATFORM

The OA platform is a powerful, affordable, and flexible platform for behavioral health analytics

Configurable on every key dimension. The core of the OA engine is its ability to configure by all the key factors needed for both usage and analytics: Roles, Organization, Relationship, Assessment and any Data Tag to achieve finer granularity in reporting

Everything is comparable. Because OA enforces a standard across diverse organizations with different EHRs and configurations, every organization can be compared apples to apples in terms inbound patient complexity, risk, and outcome efficiency.

Any data is collectible across any number of providers and patients. OA sits at the center of a network of organizations and there is no limit to the size of that network. So, a single organization can benefit from OA and county or states with 100s of organizations to manage can also have fine grained control for managerial and patient monitoring services.

Any assessment protocol can be transformed with our algorithm engine. OA does not only support over fifty assessments, every one of those assessments can be transformed into other forms to gain additional insight as well as being textualized from numerical rankings to human readable prose form.

Our advanced reporting engine enables simple point and click report creation, customization, and broadcast with a complete library of reports. The variation of reports in OA is unlimited. All these reports can be custom cut for the data of any one role or organization and broadcast on a user-defined schedule.

Analytic Dashboards built in. Prefix contains extensive dashboards for data exploration so there is no need for separate analytic or dashboarding tools.

Compliance reporting with ease. The OA data machine gives you to the tooling to effortlessly construct compliance reporting as appropriate for your organization.
