

Improve quality metrics while lowering healthcare costs

Between mounting financial strain, lack of visibility into patient adherence, and disengaged patients, navigating value-based arrangements can be tricky.

Propeller tackles health systems' toughest challenges by focusing on the quadruple aim:

Enhancing the Patient Experience

- Empower patients through sustainable, positive behavior changes
- Deliver personalized care to motivate and engage patients
- Fulfill patient expectations for more digital care options

Improving the Clinician Experience

- Leverage clinical decision support within your native workflow
- Streamline care coordination
- Identify and proactively intervene with at-risk patients
- Receive comprehensive support for efficient patient onboarding and continued patient engagement

Delivering Clinical Outcomes

- Improve quality metrics across the board
- Transform chronic condition management
- Reduce costly exacerbations

Reducing Cost of Care

- Increase patient adherence
- Reduce unnecessary, acute resource utilization
- Administer the right treatment, at the right location, at the right time

Spend your limited resources improving the outcomes that matter most

Improve Quality Metrics

- ✓ Reduce healthcare utilization (admissions and ED visits) up to 35%¹ and 57%² for COPD and asthma patients, respectively
- ✓ Improve Asthma Medication Ratio
- ✓ Tailor and monitor COPD medication use after acute exacerbation
- ✓ Enhance care coordination and patient safety
- ✓ Increase patient satisfaction

Lower Healthcare Costs

- ✓ Save \$600 per asthma patient per year³
- ✓ Save \$4K per COPD patient per year⁴

It's never been easier to transform your population health initiatives.
