

Artisight

Healthcare Through
the Lens of Possibility

Clinic

Optimize ambulatory clinic workflows and reduce the documentation burden

Ultra-wideband RTLS and real-time workflow automation
increase patient and staff satisfaction

Elevate your clinic's performance with a system that passively tracks patient movement through every step on their clinic journey.

Artisight's real-time data capture and retrospective analytics give clinicians and managers a continuous pulse on clinic workflows, while arming them with the strategic insights to make operational improvements.

Reduce friction by helping clinicians do more with less effort

Improve patient check-in, coordinate patient activities, unlock clinic efficiencies, and manage telehealth visits – all from a single platform.

- Clinic Coordination
- Chair-Level Accuracy RTLS
- Automated Check-In
- Patient Notifications
- TeleConsult
- ClinicQ
- ClinicQ + UWB Tracking

artisight.com

Key features:

- **Ultra-wideband Tracking:** Smooth patient check-in and chair-level accuracy (updates 1x per second) with our Real-Time Location System (RTLS) clinic map.
- **Workflow Automation:** Focus on quality patient care as Clinic Coordinator automatically and passively checks patients in for each stage of their journey.
- **Performance Dashboards & Analytics:** Gain comprehensive clinic performance insights with custom reports and dashboards.

Benefits of Clinic Coordinator:

- **Enhanced Efficiency:** Streamlined operations and real-time patient tracking for a smoother clinic experience.
- **Higher Patient Satisfaction:** Optimized workflows and accurate tracking for happier patients.
- **Data-Driven Decisions:** Custom analytics empower informed choices.
