

Streamline Fax Processes

Digitize and automate manual fax workflows

PH Capture

Seamless Workflows Securely share and manage

EHR Integration Optimize existing technology

Reduced Costs Improve operational efficiency

Productivity Reporting Drive staff efficiency

AI-Powered Optical Character Recognition

What you can do with PH Capture:

Document Indexing
Securely view, sort, save and search patient info within seconds

Direct Document Export
Clinical documents are added to any patient record/EHR with a single click

Customizable Workflows
Monitor workflow in real-time to optimize your team's performance

Direct Messaging
Improve workflow efficiencies with bi-directional communication

Private Address Book Support
Search across any practices or providers when indexing and exporting

Bi-directional Faxing
Reduced phone time and hours spent manually faxing

Reporting Dashboard
Real-time analytics for operational efficiency

HIPAA and SOC 2 Compliant
Ensure your organization has the necessary security controls and policies to protect data

Role Based Access Control
Create unique permissions with defined functions within your organization

"PH Capture has helped our department improve communication by giving all team members full visibility to incoming documents, regardless of location. The implementation process was simple, with no disruptions to our organization."
HCA NC Division Department
