

Suki Partnerships

Best-in-class ambient and voice experiences for
EHRs and technology companies.

Suki offers our award-winning technology to partners who want to add AI ambient and voice capabilities to their solutions. Our technology is patented and tuned for healthcare, delivering accurate, natural experiences.

Suki partners with the leaders in healthcare technology.

Three partnership options

Integrate

Integrate Suki Assistant with your EHR, for a seamless experience for clinicians. Suki ambiently generates notes, suggests codes, and answers questions, pulling the latest information from the EHR. Once notes are done, they are sent back to the system of record.

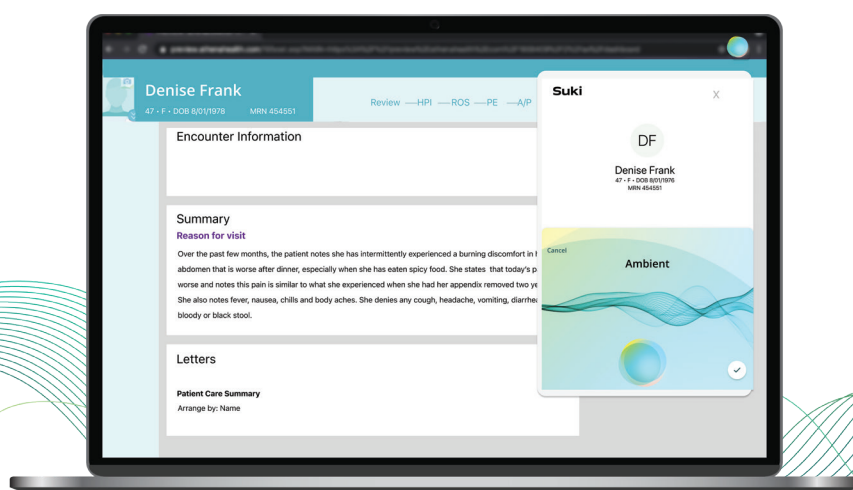

Embed

Embed Suki Assistant within your solution for an enhanced experience. Suki powers ambient documentation, voice editing, dictation, and more within your UI.

Build

Build custom ambient and voice experiences for your solution with Suki Platform, our suite of APIs. Suki Platform can power ambient documentation, voice commands, dictation, form filling, and more.
