

Easy Patient Referrals

Standardize referrals across disparate systems

PHExchange

Time-to-Appointment Set custom KPIs

Patient Satisfaction Improve CAHPS scores

Rapid ROI Keep referrals in-network

Built-in Analytics Understand referral patterns

EHR Integration Optimize your workflows

What you can do with PH Exchange:

Referral Dashboards

Receive, review, send and respond to electronic and faxed referrals

Centralized Provider Directory

Research potential referring providers and easily look up for insurance

Secure File Sharing

Export patient files, x-rays, and labs with end-to-end encryption to your EHR

Automated Referral Status

Automatically send status updates to referring providers and close the feedback loop

Direct Messaging

Securely send bi-directional messages to providers and exchange patient files

Automated Workflows

HL7 interfaces to increase operational efficiencies for staff

Analytics Dashboard

Network and practice level data to understand referral patterns and leakage trends

Digital Fax Management

Manage all inbound/outbound faxing, document editing, OCR, and document exporting

Role Based Access Control

Create unique permissions with defined functions within your organization

"We now have a seamless, 'closed loop' workflow to support prompter and better-coordinated care delivery. Everyone benefits, including both our member practices and our patients."
Elissa Langley, VP, Chief Operating Officer | Triad HealthCare Network
