

WHAT ARE CARE MANAGEMENT SERVICES?

Care management services are personalized support services designed to **assist patients** in managing their health more effectively. They involve a team of **healthcare professionals** who work collaboratively to coordinate and support your **care needs**.

HOW DO THEY HELP?

20-30%, reduction in hospital readmissions among enrolled patients

Cost savings of **\$3,000 to \$4,000** per patient annually

Improvement in Chronic disease management by **25-30%**

Improved medications management by **20-30%**

80-85%, reported patient satisfaction levels

ARE THEY FOR YOU?

- Are you concerned about your **health condition(s)**?
- Do you need help with **medication management**?
- Do you want to stay connected with your **care team from home**?

If your answer is **"YES"** to any of these questions, please talk to your **physician today** to know more to check your **eligibility** and find the **service(s)** that best suit your needs.

Remote Patient Monitoring (RPM)

Chronic Care Management (CCM)

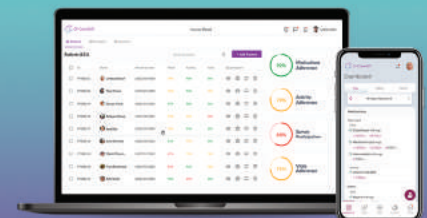

Transitional Care Management (TCM)
