

# Take Charge of Your Health

OnCare360 Remote Patient Monitoring is a way to stay connected with your health care team from home, so you have the support when you need it.

Ask your physician today

## Health at Home

OnCare360 and your clinical care team make managing your health at home effortless

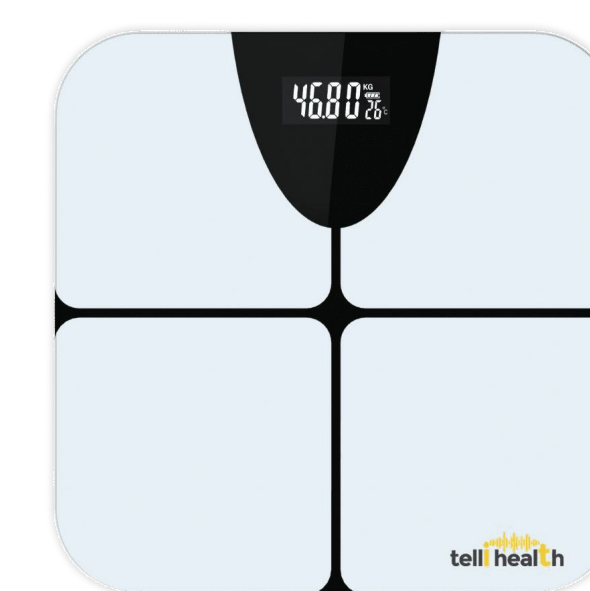

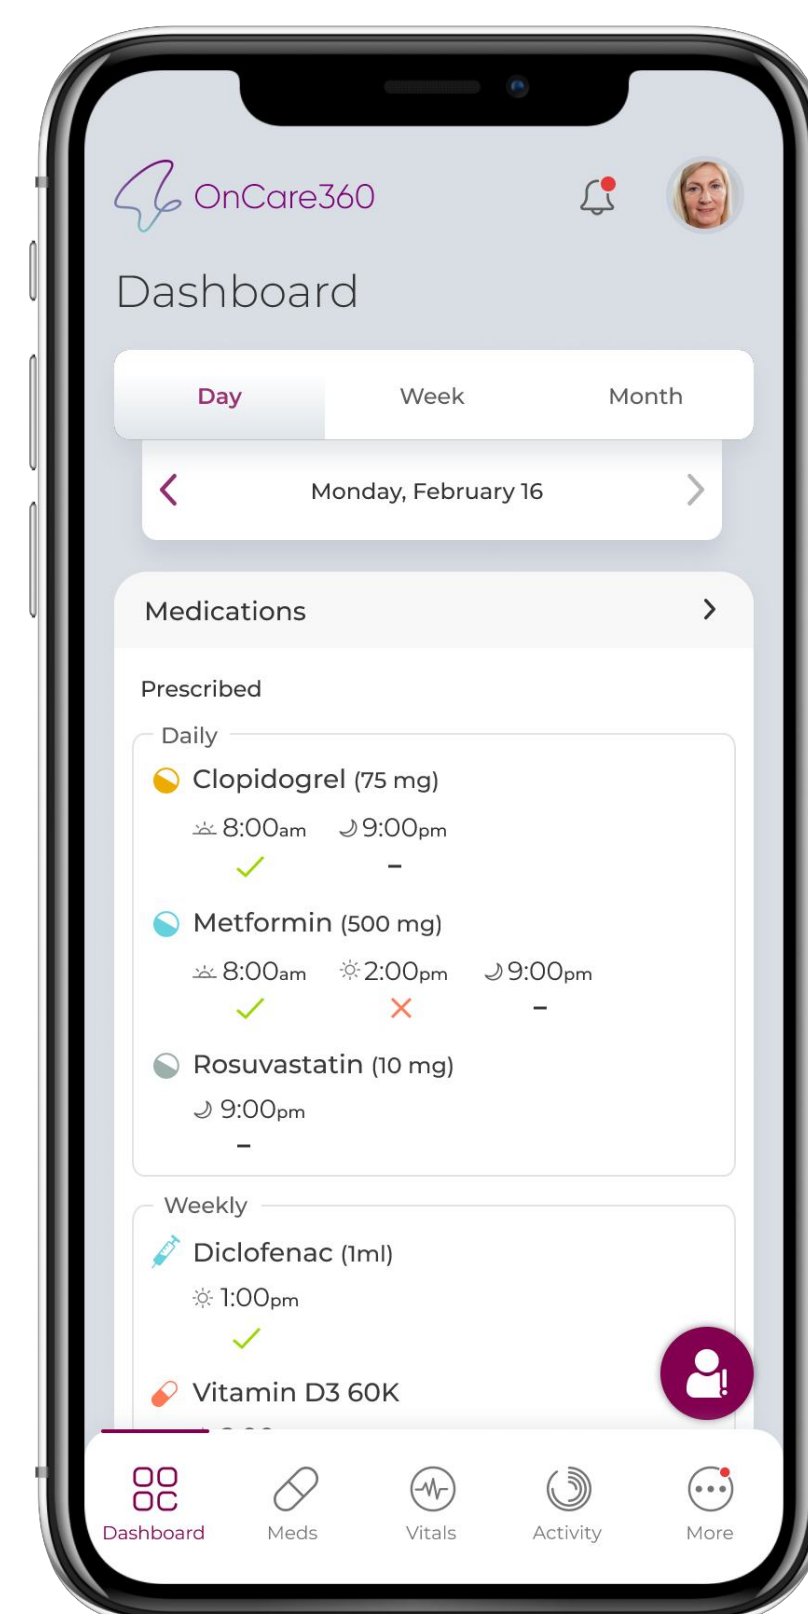

## Remote Monitoring

Alerts are sent to the clinical care team when your vitals are outside of their pre-determined thresholds

## Care Reminders

OnCare360 is programmed to match your personalized care plan

Reach out to your clinical care team today to discuss how you can minimize the risk of hospital admission.

You are responsible for all applicable copay and deductible amounts (including, if you are a Medicare beneficiary, the copay for Part B services)
