

# Cost and Utilization Dashboards

Reduce healthcare spending without compromising on care quality

Understand and track your organization's cost drivers and utilization metrics to gain actionable insights and identify cost-saving opportunities across cost centers. Improve care quality and clinical outcomes while keeping costs in check by addressing high-cost utilizations such as readmissions, IP admissions, ED visits, SNF referrals, laboratory and radiology expenditures, leveraging three dedicated dashboards.

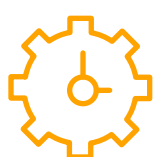

## What makes our dashboards unique:

Gain granular insights into cost and utilization metrics for each cost center separately.

Drill down to physician/patient/procedure/facility/service level to identify targeted issues.

Choose from a range of filters and create registries to effectively dissect problem areas.

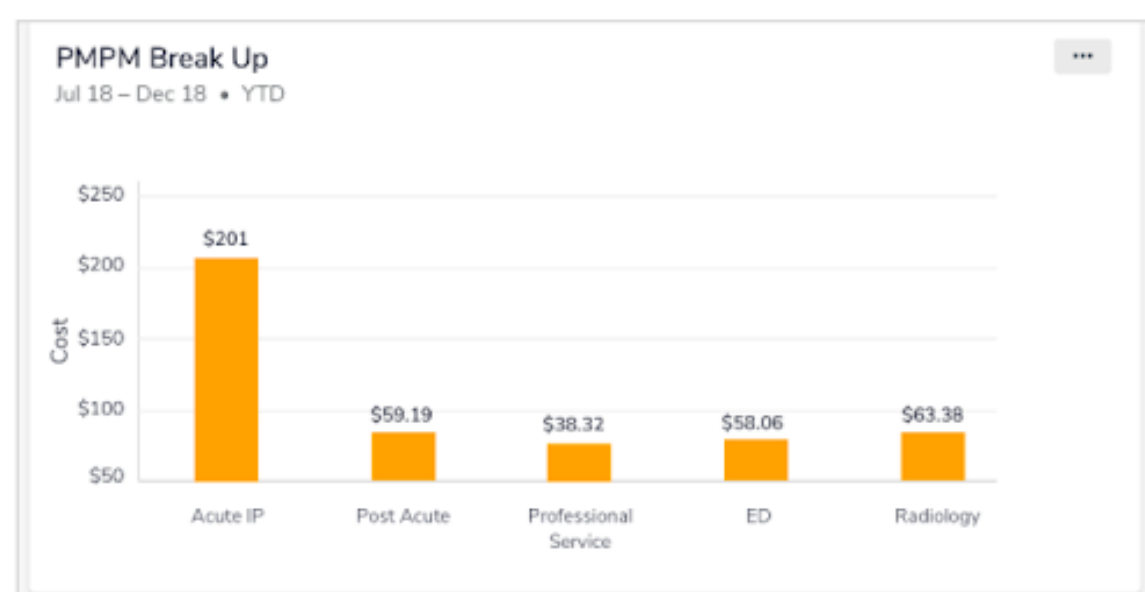

Track and stay on top of KPIs using automated alerts and compare changes over time.

Dashboards are configurable according to the organization's needs and priorities.

Built-in access controls to enable collaboration without compromising on data security.

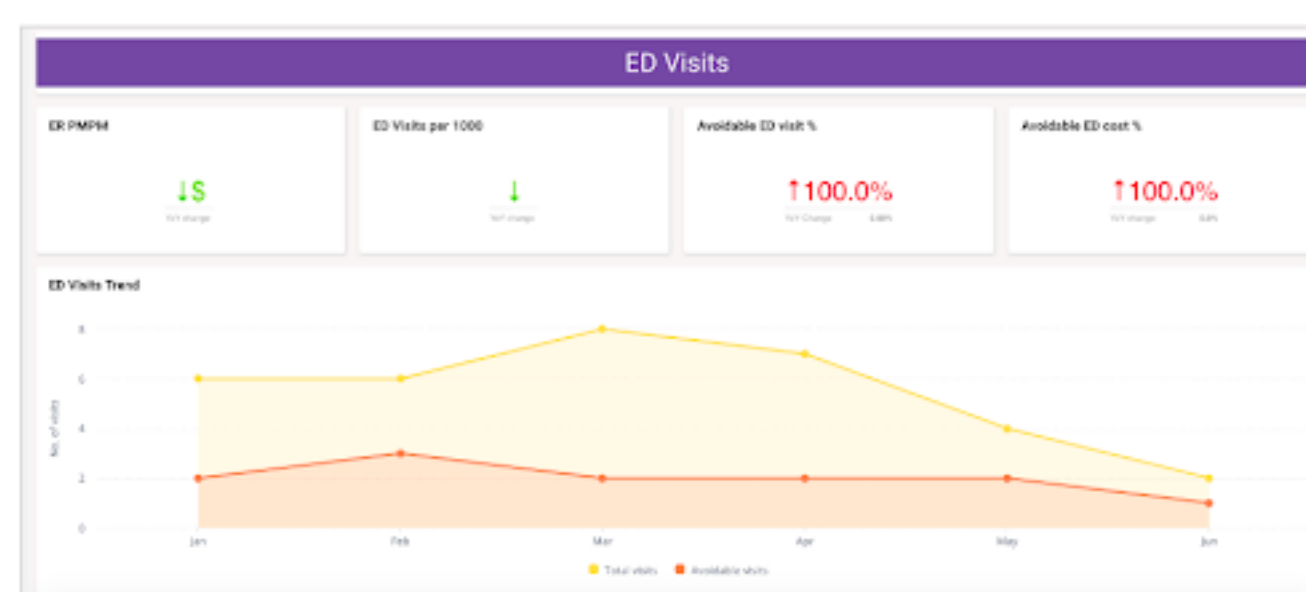

## Total Cost of Care Dashboard

This unique dashboard offers organizations crucial visibility into the Total Cost Of Care data (TCoC) for attributed patients, further showing the breakdown of PMPM (per member per month) costs based on DRG, Major Diagnosis Category, facility, or service type.

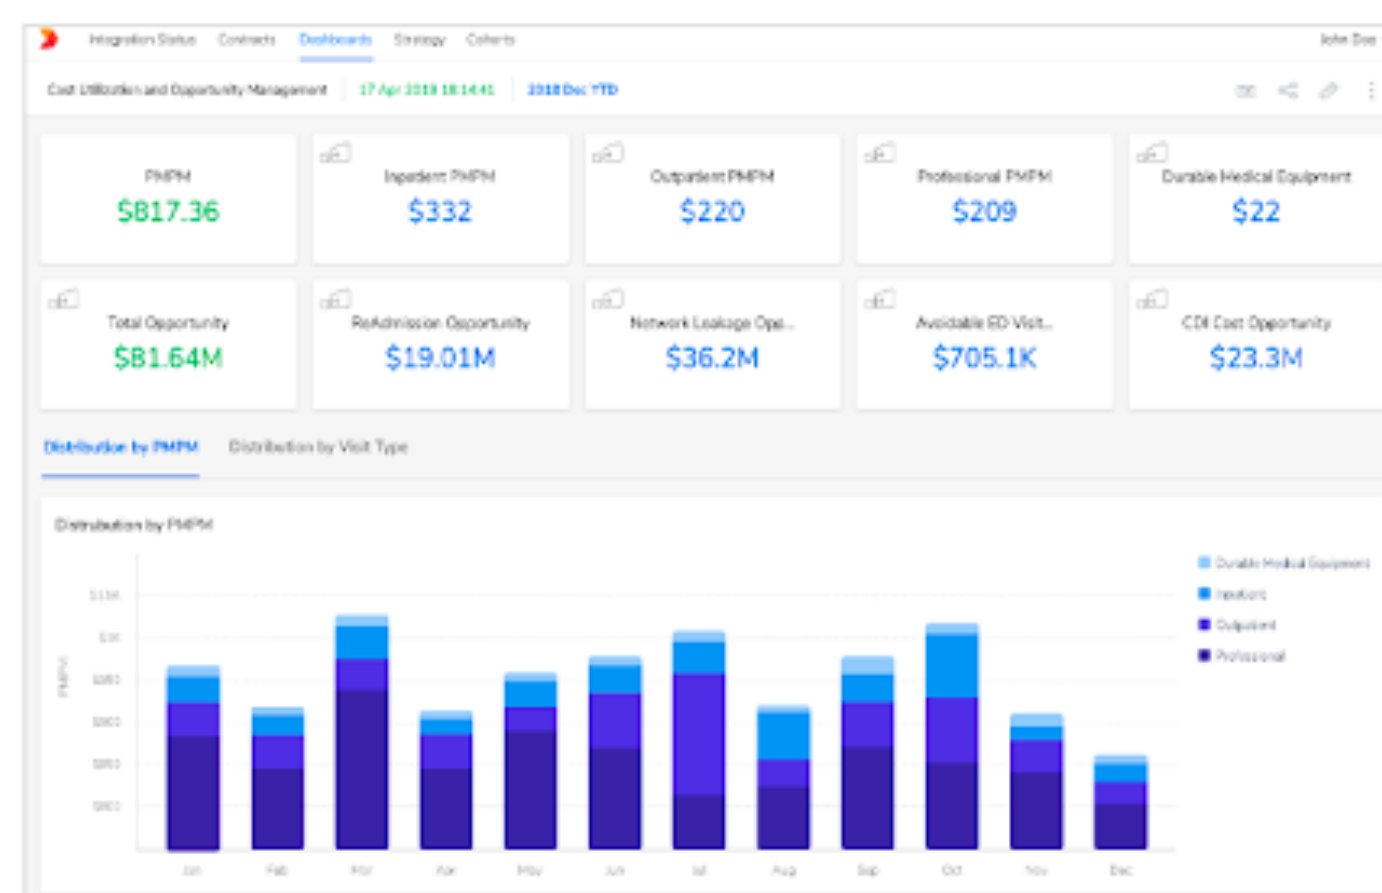

## Utilization Dashboard

Innovaccer's utilization dashboard provides advanced drill-down analytics regarding utilization metrics of cost centers. Organizations can gain insights on the current cost PMPM, readmission rate, avoidable high-cost utilization, within and out-of-network utilization, and other factors affecting healthcare spending, thereby highlighting cost-reduction opportunities across major cost centers. Users can get granular up to the level of DRG, type of procedure, provider (PCP and specialist) and members, to allow targeted problem identification and interventions.

## ED Utilization Dashboard

This dashboard tracks total ED visits per 1000 members, helping identify avoidable ED utilization. Users can get granular insights by drilling down to practice, patient and provider level to identify those with high ED visits and to address them in an impactful way.

## About Innovaccer

Innovaccer Inc., the Health Cloud company, is dedicated to accelerating innovation in healthcare. The Innovaccer® Health Cloud unifies patient data across systems and care settings, and empowers healthcare organizations to develop scalable, modern applications that improve clinical, financial, and operational outcomes. Innovaccer's solutions have been deployed across more than 1,600 hospitals and clinics in the US, enabling care delivery transformation for more than 96,000 clinicians, and helping providers work collaboratively with payers and life sciences companies. Innovaccer has helped its customers unify health records for more than 39 million people and generate over \$1 billion in cumulative cost savings. Innovaccer is the #1 rated Data and Analytics Platform by KLAS, and the #1 rated population health technology platform by Black Book.
