

Health Equity

Address the Impact of SDoH on Patient Health and Drive Equitable Care

Understand and manage population needs with ADI information and member-level social vulnerability index (SVI) scores. Identify and address health equity issues to improve service delivery to underserved communities.

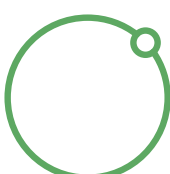

Why Health Equity?

Build population cohorts on social risk levels for targeted interventions with a health equity dashboard

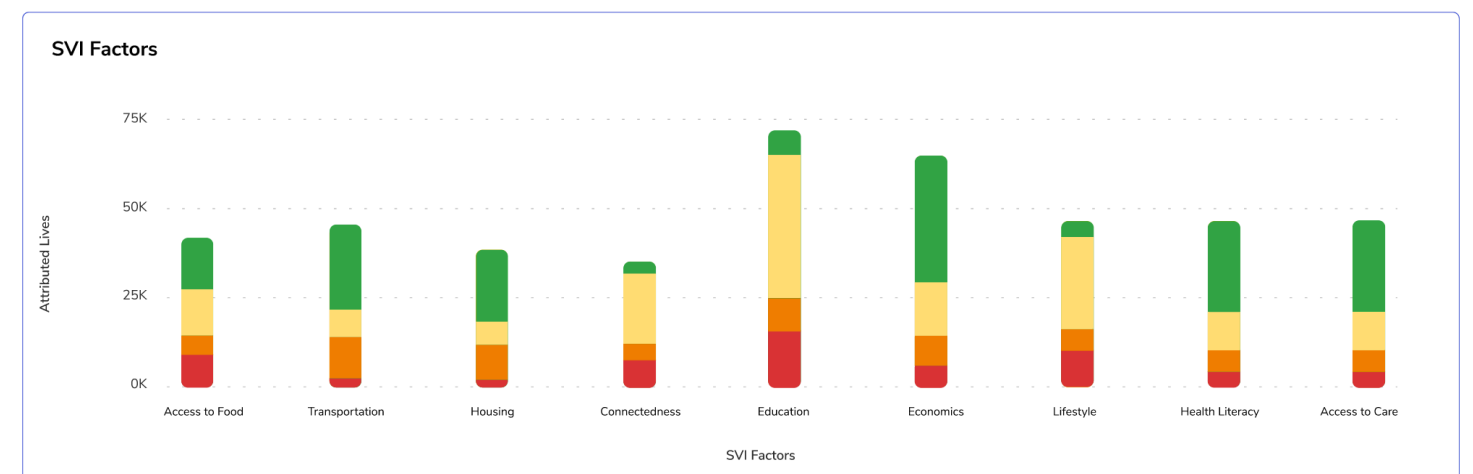

Gain SDoH insights at the point of care to offer personalized treatment and community resources

Facilitate closed-loop communication among stakeholders with automated alerts

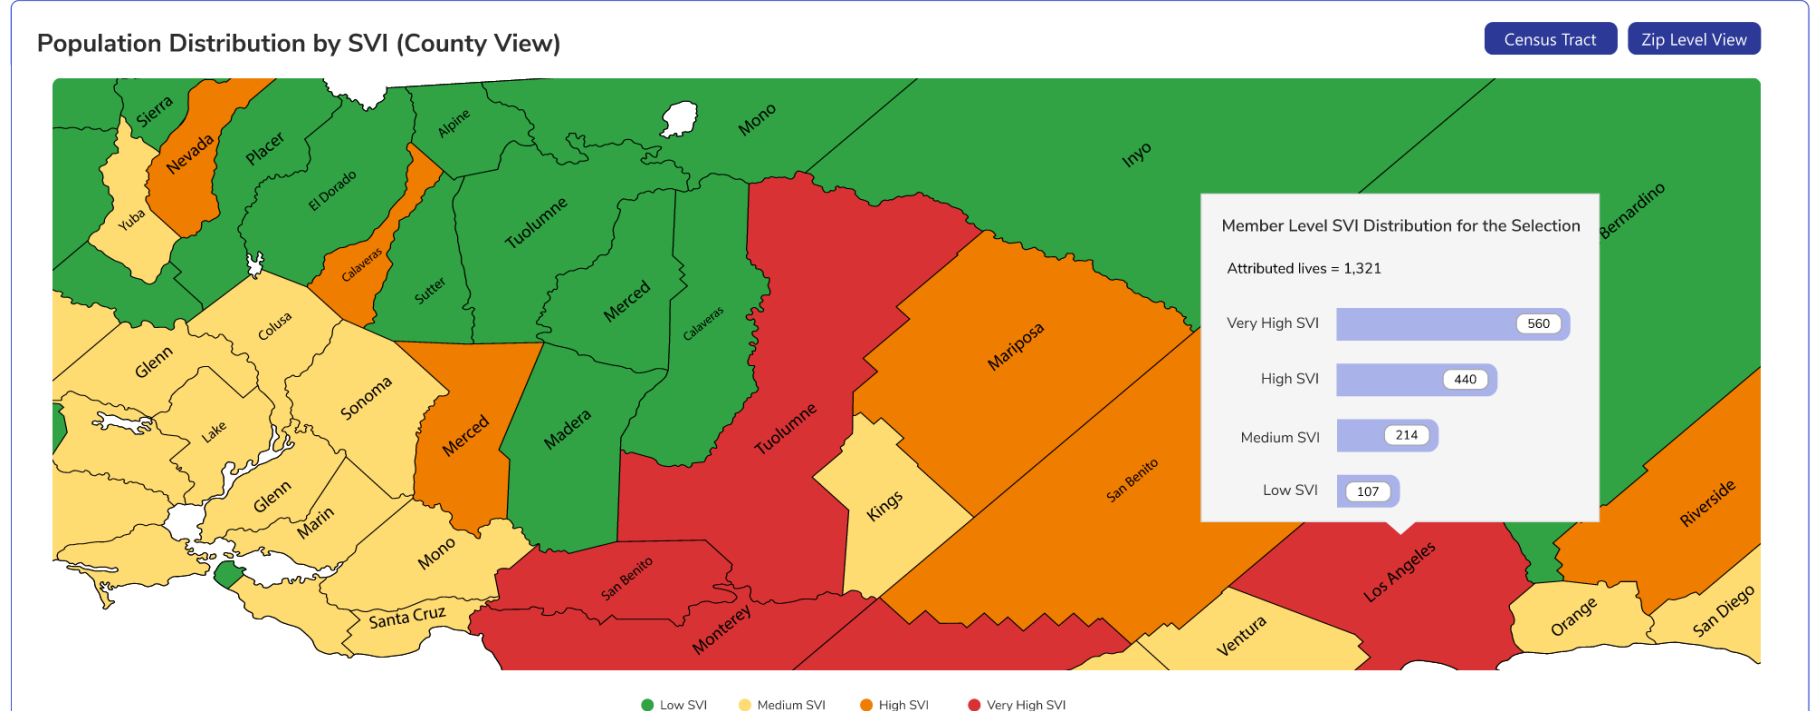

Run surveys to gather updated SDoH information with pre-built survey forms and templates

Population Profiling

Total Attributed Lives	Low SVI	Medium SVI	High SVI	Very High SVI
371,013	Attributed Lives: 223,567 Population Percentage: 60.2%	Attributed Lives: 110,097 Population Percentage: 29.6%	Attributed Lives: 12,456 Population Percentage: 3.35%	Attributed Lives: 24,893 Population Percentage: 6.7%

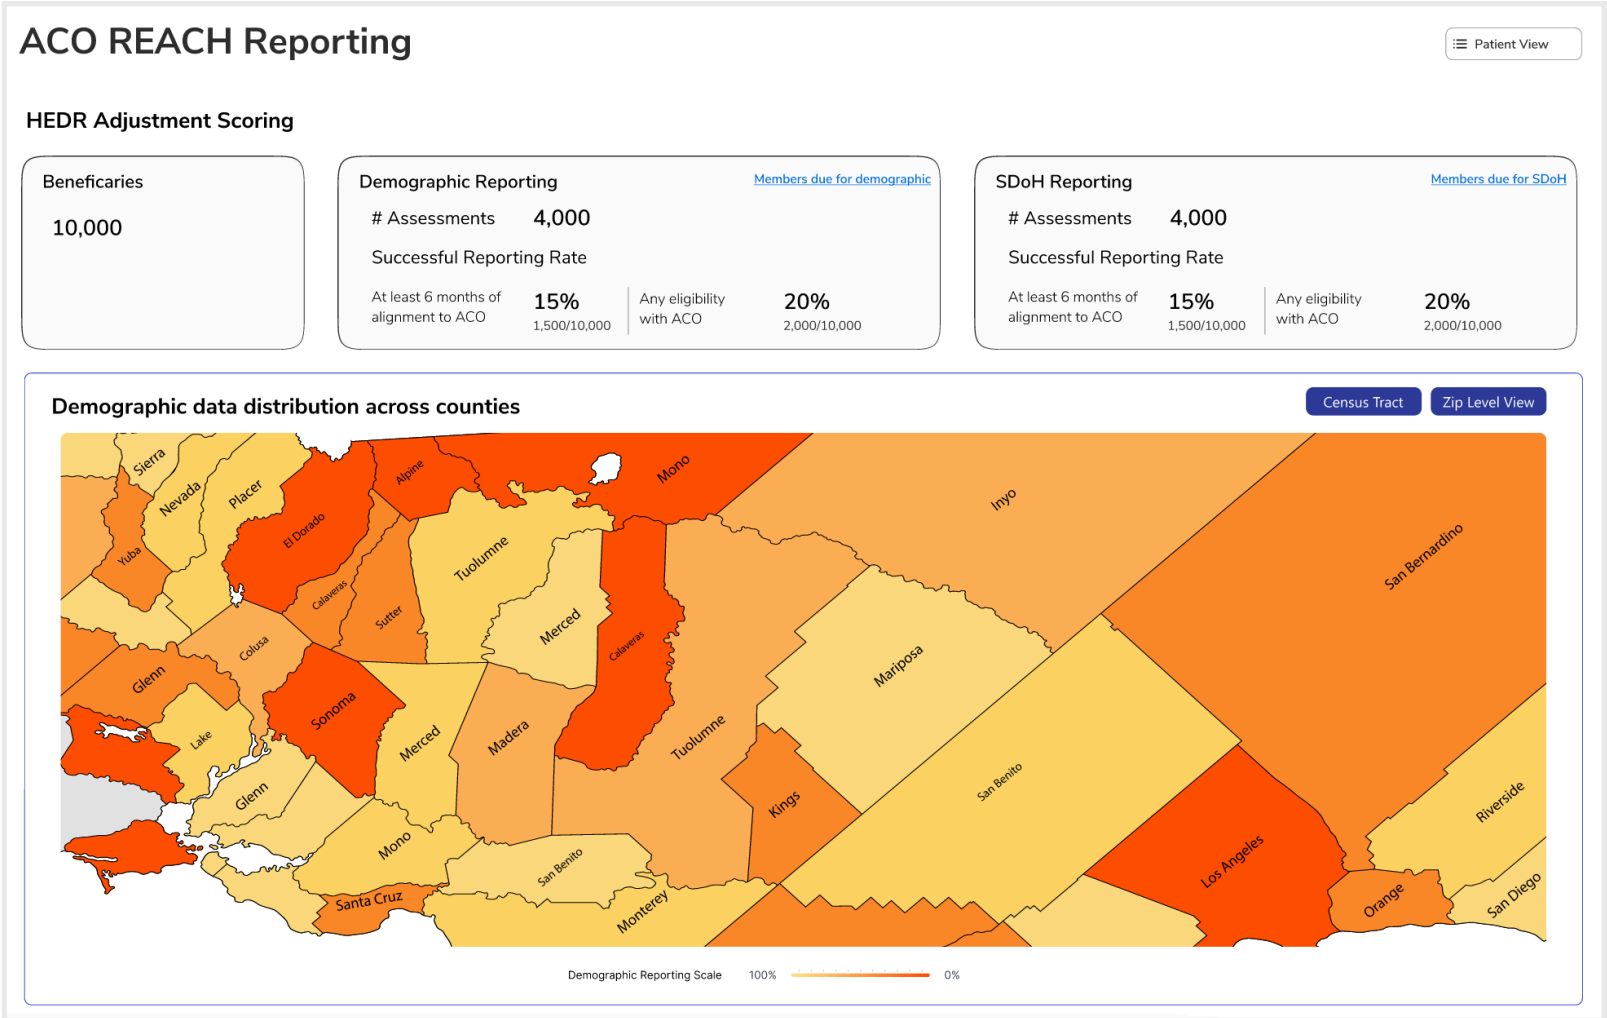

Drive Inclusive Healthcare With Innovaccer's Health Equity Solution

Identify Social Needs of Your Population

Use member-level proprietary SVI scores to stratify patients by social risk, and administer customizable SDoH assessments to drive personalized interventions and community resource referrals.

Ensure Effective Stakeholder Alignment

Tap into the largest network of community resources to bring patients, providers, and community resources together on one platform. Dynamically prioritize community resources based on patient feedback. Quickly search 58 social factors, seven data sources, more than 300 service types, using over 200 filters at the Zip Code level to find the right solution.

The screenshot shows the 'Social Determinants of Health : Cohort Builder' interface. It features a top navigation bar with dropdown menus for 'Select County', 'Select Zip', 'Select Census Tract', and 'Overall ADI'. Below this are several filter panels for different social determinants: Member Level ADI Distribution (159), Race (240), Ethnicity (417), Age Groups (329), Gender Identity (159), Preferred Language (413), Open Care Gaps (413), PCP Visits (122), ED Visits (436), Attributed Lives across Documented Risk (159), Attributed Lives across Undocumented Risk (216), and PMPM (519). Each panel contains checkboxes and radio buttons for selecting specific criteria.

Empower Physicians at the Point of Care

Address the population's social needs at the point of care by highlighting the most relevant risk factors and tracking performance metrics with the health equity dashboard.

Enable Closed-Loop Referrals

Streamline SDoH data collection through customized surveys and assessments to automate workflows and ensure closed-loop communication between patients, care providers, and community resources.

About Innovaccer

Innovaccer Inc. is the #1 data platform for value-based care. The Innovaccer platform unifies patient data across systems and care settings, and empowers healthcare organizations with scalable, modern applications that improve clinical, financial, operational, and experiential outcomes. Innovaccer's EHR-agnostic solutions have been deployed across more than 1,600 hospitals and clinics in the US, enabling care delivery transformation for more than 96,000 clinicians, and helping providers work collaboratively with payers and life sciences companies. Innovaccer has helped its customers unify health records for more than 54 million people and generate over \$1 billion in cumulative cost savings. The Innovaccer platform is the #1 rated Best-in-KLAS data and analytics platform by KLAS, and the #1 rated population health technology platform by Black Book.
