

AiRISTA's Staff Safety Solution

Empower your staff with the safety and confidence they deserve

Instant Alerts. Immediate Response. Enhanced Protection.

Healthcare professionals face increasing workplace safety risks, requiring a reliable, real-time solution to ensure their well-being. AiRISTA Flow's Staff Safety Solution provides caregivers with discreet, immediate duress alerting—enabling security teams to respond to incidents swiftly and effectively.

The Challenge: Rising Workplace Violence in Healthcare

According to IAHSS, assaults against healthcare workers increased from 9.3 per 1,000 workers in 2016 to 11.7 in 2018. While 75% of all workplace assaults occur in healthcare settings, underreporting remains a critical issue—only 30% of nurses and 26% of physicians report incidents. These risks not only threaten staff safety but also contribute to increased absenteeism, burnout, and operational inefficiencies.

Proactive Protection & Rapid Response

Our advanced Staff Safety Solution integrates seamlessly with your existing Wi-Fi infrastructure, ensuring minimal disruption and maximum effectiveness. Features include:

- **Instant Duress Alerts** – A simple pull-down switch sends an emergency signal.
- **Two-Way Communication** – Staff receive immediate confirmation that help is on the way.
- **Multi-Channel Alerts** – Notifications are sent via Wi-Fi to security personnel, management, and nearby colleagues.
- **Real-Time Location Tracking** – Security teams know exactly where assistance is needed.
- **Man-Down Detection** – Automatically triggers alerts if an employee is incapacitated.
- **Customizable Response Workflows** – Alerts can be escalated and integrated with security systems, including surveillance cameras and access control.

How it Works

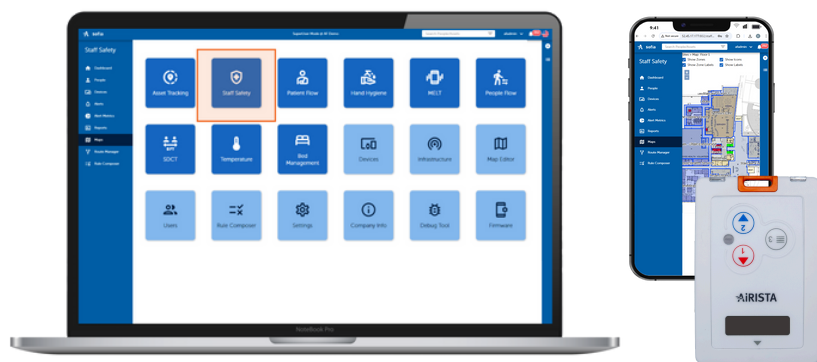

Emergency Activation – Staff members trigger an alert using their wearable badge tag.

Immediate Notification – Alerts are sent to security personnel, nearby colleagues, and management.

Real-Time Location Tracking – The staff member's exact location is displayed on a virtual floor plan.

Automated Escalation – If assistance is not acknowledged within a set timeframe, the alert is escalated.

Forensic Analysis & Reporting – Incident logs and response times help refine protocols and ensure compliance with emerging regulations.

Solution Benefits

- **Real-Time Staff Location Tracking** – quickly locate personnel during emergencies
- **Supports Multiple Use Cases** - examples include hand hygiene and nurse rounding
- **Customizable Alerts & Notifications** – set up multiple call buttons for different situations
- **Optimized for Indoor & Outdoor Use** – effective in all areas of your facility
- **Leverages Existing Wi-Fi Infrastructure** – no need for costly new hardware
- **Proven & Scalable** – successfully deployed in hundreds of healthcare environments
- **Faster Emergency Response Times** – minimize risk and improve staff confidence
- **Mass Communication Capabilities** – send urgent group messages instantly

Enhanced Security Integration

AiRISTA Flow's security partners provide additional safety measures, including:

- **Automated Security Camera Repositioning** – Cameras focus on the incident location for better visibility.
- **Access Control & Door Locking** – Secure critical areas in response to a duress alert.
- **Enterprise-Wide Visibility** – View staff locations and security events in real-time via an intuitive dashboard.

AiRISTA is proud to be recognized by Gartner for being in the “Leaders” quadrant in 2022, 2023, and 2024.
