

# Real World Evidence in Minutes.

## Meet **Geneva OS™** and **ChatRWD™**, by Atropos Health.

*Unlock Operational Efficiencies, Staff Augmentation, and ROI with Rapid Evidence Generation.*

### Atropos Health

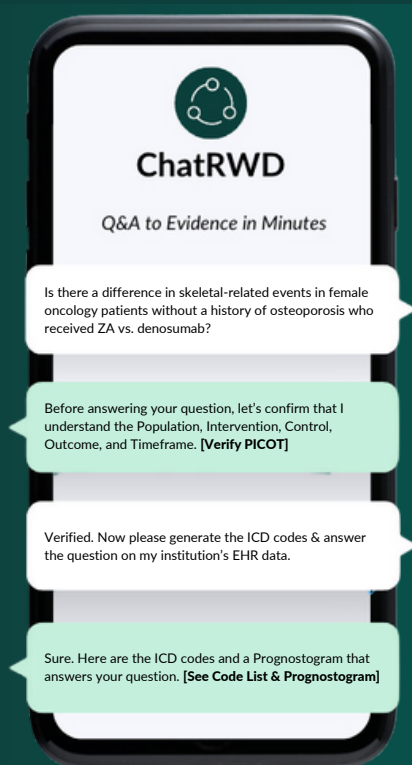

Atropos Health utilizes healthcare data to provide on-demand evidence quickly. Our Geneva OS structures healthcare data and transforms it into insights that can drive down costs, increase efficiency, address care variation with evidence-based pathways, and expedite research and analytics. Partner with us to start seeing these benefits Day 1.

### Geneva OS

**GENEVA OS** is the generative evidence acceleration operating system for healthcare. With easy install, it converts data from EHRs & Atropos Evidence Network into useful evidence, fast.

Geneva OS solutions include:

- **Green Button:** Q&A to Prognostogram RWD reports in 48hr with clinician expertise
- **Atropos Evidence Library:** 10K+ preloaded publication-grade studies across 30+ specialties
- **Atropos Evidence Network:** 160M+ patients' records over 10+ years, now global
- **Powerful Analytics Tools:** Augments speed & capabilities for cohorting, querying, studies.

### NEW: ChatRWD

Get healthcare insights in minutes with ChatRWD. It's the first generative AI application to deliver full observational studies on healthcare data in minutes, transforming the way you access evidence.

- Ask a clinical question & select data source
- ChatRWD checks its assumptions (generates PICOT and list of clinical phenotypes, verifies they are what the user wants)
- Sends request through Geneva OS analytics pipeline
- Returns Prognostogram (a full observational study report) or other selected deliverable - such as counts, an abstract, and more

Healthcare's first AI-Powered Chat to Database is Here.

# Harness the Untapped Potential of Healthcare Data with Atropos Health's Geneva OS

## Day 1 Value

10K study library & Q&A to RWD studies in 2 days on 160M+ de-identified patients' data, US & Global

## Easy Implementation & Data Activation

Atropos completes the 2mo. install in your infrastructure. Structures data for easy use.

## Real World Evidence, On-Demand

Green Button, ChatRWD, Library, & Power Tools on your data deliver rigorous studies & insights fast, at scale

## Lasting ROI & Clinical Impact - From Your Data & Evidence

Use these capabilities to achieve rapid ROI. Evidence-based care pathways to address care variation, find targeted interventions to reduce LOS, produce more research, optimize pharmacy formulary design, and more.

Nick Patel MD

Becker's Panelist, Atropos Clinical Advisory Board Chair, Fmr. CDO, Prisma Health

*"The time to value is very quick. As a digital leader, when I bring in new technologies, it usually takes 3-6mo before I see any benefit. With Atropos Health, you get benefits on day one. You have access to hundreds of millions of patient records, a library of thousands of novel studies, and the ability to generate insights on local data to improve care at your health system."*

## Proven Return on Investment with Atropos Health's Geneva OS

650 bed hospital saves millions per year with evidence-based decision making

**\$576K/year savings** with 3 data-driven formulary decisions

[See the ASHP Poster](#)

**\$1.2M/year savings** on research. From idea to publication in 6wk
