

Easy, efficient billing.

Transforming unscheduled calls into documented care.

Proper documentation is key.

CMS currently provides reimbursement for established patient video encounters, but only with proper documentation.

With LogiCall, smart device video calls between patient and provider are billable at the same RVU rate as in-person visits, as long as they do not result in an urgent appointment, are not related to a prior visit within the last 7 days, or fall within the global period of a prior procedure or surgery.

***Only physicians, NPs, and PAs may bill these phone calls.*

Your time matters — get reimbursed for it.

LogiCall's documentation meets CPT billing standards for Government and Commercial Insurance.

Q: Would a GA modifier be employed for the 99499 CPT Code?

A: 99499 is an "unlisted" code that is conventionally employed for calls under 4 minutes. A GA modifier would be added for Medicare patients with a signed ABN.

Q: What documentation is needed for a 99499 CPT code?

A: LogiCall maintains a copy of the call as form of electronic verification of the call between the patient and physician.
