## CLINICAL AUDIT PREVIEW

### OVERALL COMPLIANCE SCORE:

Not provided in source data.

### RISK LEVEL:

Not provided in source data.

## CHAPTER 1:

This preview summarizes the Hand Hygiene Documentation Review audit conducted from 1–30 September 2026. The audit objective was to review the presence of hand hygiene documentation in the supplied records. Ten records were reviewed to determine the presence or absence of hand hygiene documentation. Of the records reviewed, 7 (70%) contained hand hygiene documentation, while 3 (30%) lacked this documentation.

## CHAPTER 2:

### Finding: Hand Hygiene Documentation Absence

Severity: Not provided in source data.

Observation: Out of 10 records reviewed, 3 records were found to be absent of hand hygiene documentation.

CAPA: Not provided in source data.

## CHAPTER 3:

The primary finding from the audit indicates that 30% of the reviewed records lacked hand hygiene documentation. The supplied information does not include the applicable hospital policy, a defined compliance standard, staff observations, patient outcomes, reasons for missing documentation, or evidence of corrective actions. Therefore, an overall risk classification or severity level for this finding cannot be established from the provided data.

## REGULATORY FLAGS:

- No specific regulatory framework provided in source data.

## AUDIT DATES:

Audit Period: 1–30 September 2026

**FINAL AUDITOR NOTE:**

This preview represents a limited view of the audit analysis, strictly adhering to the provided source data. The full report will provide a complete structured audit, including any further details that become available.
