

# Simplify Your eCQM Reporting with Automated Data Integration and Advanced Analytics

Speed up and error-proof your reporting processes to identify, proactively act, and keep every stakeholder informed on care gaps

Deep dive into your data to measure, manage, and act on it to improve clinical and financial outcomes with Innovaccer's new eCQM reporting capability. It simplifies eCQM reporting needs for organizations with diverse EHRs by automating data integration from disparate sources, creating a single source of truth for each patient, and enabling automated addition of evidence for each measure in line with complex CMS exclusion rules and measures applicability. Easily identify data gaps and track the reporting status to discover lagging facilities, personnel, and measures that need intervention.

## Meet all eCQM Reporting Needs with the Power of Intelligent Automation

### Identify Patients Who Need Urgent Attention with Granular Insights for Each Measure

Track progress of each measure with drill-down capabilities to the patient, PCP, and linked provider levels. Allow easy identification of key problem areas to allocate necessary resources to help patients with the most urgent needs, and meet targeted performance criteria.

### Track Reporting Progress and Identify Actionable Insights with an Interactive Dashboard

Get detailed insights into the progress and performance rate of each eCQM measure, with a drill-down by facility type, type of coverage, and type of EHR to identify areas for low-effort, high-output interventions.

### Save Time and Reduce Errors with Automated Data Integration from Disparate Sources

See the power of our industry-leading platform which aggregates data from more than 80 EHR sources to create a unified record for every patient. It creates a single source of truth to simplify data collection, sharing, and evidence inclusion for each reporting measure to enable speedy, error-free, and timely reporting.

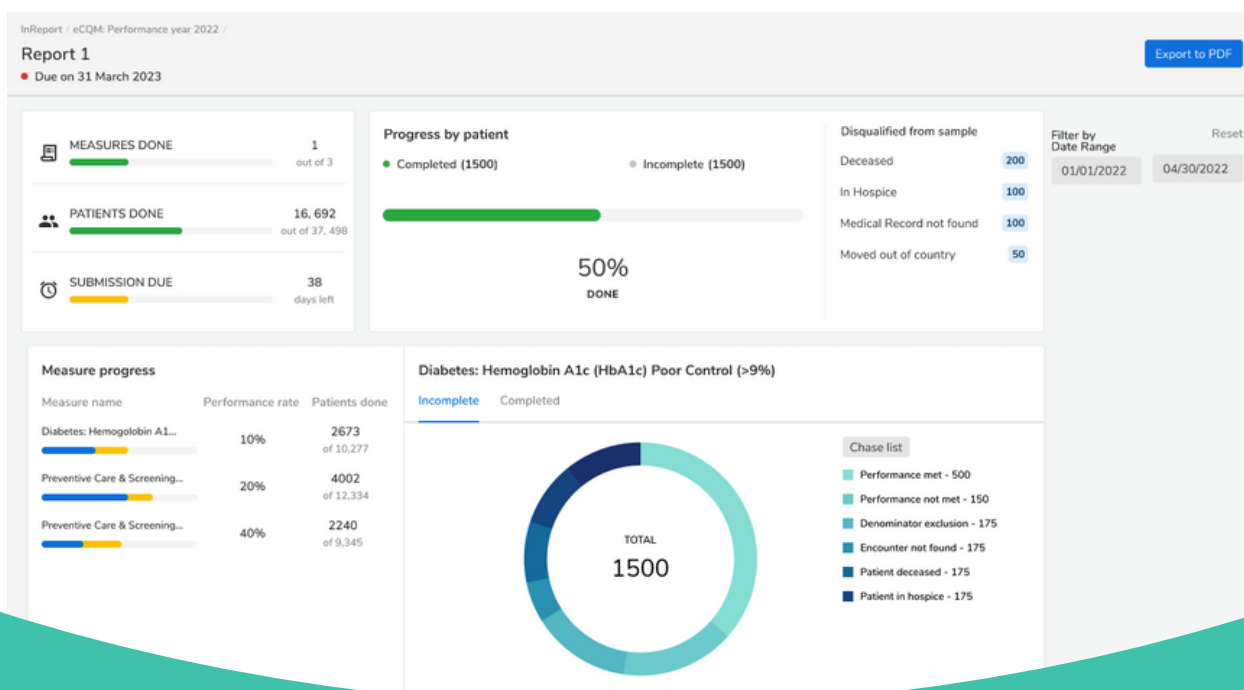

### Identify and Act on Data Gaps and Lagging Measures to Improve Outcomes

Leverage advanced analytics to pinpoint gaps in data to ensure accurate reporting, close care gaps, and improve clinical outcomes.

### Enhance Collaboration Among Quality Managers with Smart Worklists

Embed smart worklists into existing clinical workflows to help quality managers stay informed on performance metrics, and then to reassign patients to each other's worklists to enhance collaboration.

## Why Choose Innovaccer for Your eCQM Reporting?

In-built feature for direct report submissions to CMS or to Innovaccer by exporting them in QRDA III format

Unique plug-and-play solution deployment without the need for data field mapping dramatically speeds time to value

Real-time data feeds to run measures and accurately identify the numerator and denominator to ensure up-to-the-minute reporting

Smart worklists for seamless workflows and improved coordination between quality managers

Notes feature to keep all documents in one place for easy and secure access anytime and anywhere

## Solution by Numbers

65+ customers

600+ measures

60+ features to stratify populations

54M+ patient records unified

50+ adjustable visual widgets

45+ episodes of care

16+ built-in dashboards

## Awards and Recognition

Best in KLAS. Best technology. Best partner
