**Understand Coverage,  
Propel Access**

PolicyCore notifies you of the latest coverage and utilization management changes so you can adapt your patient access strategy to the market.

Start your day in-the-know. Our Alerts deliver updates from the most complete database of live and historical policies and documents in the market.

**With a PolicyCore subscription, users can:**

#### **Receive Live, Curated Notifications of Policy Changes**

- Configure what's relevant and let PolicyCore handle the research, send you the details, and give you more time to devote to patient access
  - Policy Email Alerts include notifications to: Payer policies, Draft policies, Step-edits, PA forms, Coding guidelines, Reimbursement & Billing updates

#### **Easily Access Medical & Pharmacy Policies, PA Documents, and More in a Centralized Location**

- Investigate and compare current and historical versions of many document types affecting patient access across commercial and public payers
- Dive deeper with an Advanced Search function that scans all documents for keywords you select
- Control your research by focusing on specific payers, plan types, states, therapies, devices, or document types

#### **Why Policy Reporter**

- With patented tracking software continuously scanning the the market, we provide the most accurate, most comprehensive, and timeliest change alerts available
- Our dashboards provide access to the varied types of documents impacting access to products under any benefit (medical, pharmacy, dual, specialty), whether managed by a payer, PBM, or other controller
- Policy Reporter empowers over 550 healthcare and life science companies to receive, process, and act on policy developments and coverage trends to achieve their patient access goals

## Beyond PolicyCore:

Leverage our Expertise for a Multi-Faceted Understanding of Coverage

### Payer Landscape Dashboards:

Demystify the "so what" of your coverage strength with a centralized platform - a Payer Landscape Dashboard - configured to guide your strategy, complete with scoring, weighted criteria analysis, interactive visualizations, and direct links to relevant payer documents

### Formulary Alerts:

Equip your teams with Formulary Alerts, customized emails that spotlight the formulary changes affecting your product and your competitors'

### Policy Scout:

Monitor your product's complex access scenario with the focused, curated alerts of Policy Scout. When coverage criteria for your product exists in multiple places (e.g. one for the drug and one for the companion diagnostic), Policy Scout ensures you're always aware of critical developments
